

CONTENTS - SPIS TREŚCI

Introduction	101
Barbara Błażejczyk-Okolewska, Krzysztof Czołczyński, Anna Jach	
Dynamics of the impact force generator	103
Zdzisław Gałkowski, Marek Pietrzakowski, Andrzej Tylikowski	
Dynamics of a rotating cylindrical isotropic shell	111
Jerzy Jachimowicz, Włodzimierz Karliński, Wiesław Szachnowski	
Material vs structure of aircraft turbine engines	121
Krzysztof Marynowski	
Stability analysis of axially moving system by using a rotor's model	131
Zbigniew Starczewski	
Resonant properties of a rotor supported on journal bearings with non-circular contour	137
Andrzej Tylikowski	
Influence of torque on dynamic stability of composite thin-walled shafts with Brazier's effect	145
Roman Bogacz	
Dynamics and stability of a wheelset/track interaction modelled as nonlinear continuous system	157
